Skills

- **Languages:** Javascript / Typescript, Python, SQL
- **Framework, Libraries and Tools**: Node, React, Svelte, Next, Express, Docker, GraphQL
- **Concept**: UI/UX, Micro frontend, RPC, Business Driven Development, Agile development.

Work History

Senior Software Engineer, Nov 2022 - Present
Cefalo - Dhaka, Bangladesh

- Designed and implemented a reusable component library, increasing in-house component usage by 80% and improving design consistency and development efficiency.
- Conducted comprehensive UI/UX research, analyzing user feedback and collaborating with designers to identify and resolve usability bottlenecks. This proactive approach to user-centered design resulted in a 20% reduction in development costs by minimizing rework and ensuring a streamlined development process.
- Optimized client-side rendering, resulting in a 30% performance improvement and enhanced user experience.
- Maintained 80% test coverage, contributing to high-quality, bug-free code and ensuring software reliability.

Software Engineer, Feb 2021 - Nov 2022
EchologyX - Dhaka, Bangladesh

- Led conversion rate optimization (CRO) efforts, implementing multiple A/B testing variations that resulted in up to 60% increase in user interactions and up to 30% growth in key business metrics.
- Collaborated with designers and CRO managers to implement A/B testing variations, ensuring minimal impact on website performance while maximizing conversion potential.
- Optimized application rendering by implementing Server-Side Rendering (SSR), resulting in up to 40% reduction in loading times and improved user experience
- Mentored and trained developers on A/B testing methodologies and best practices, enabling them to implement effective experiments for high-traffic websites serving millions of users for multi-billion dollar brands.

Software Engineer, Apr 2020 - Jan 2021
Binate Solution LTD - Dhaka, Bangladesh

- Engineered and deployed user and admin authentication/authorization systems, building a robust RBAC (Role-Based Access Control) solution for a large-scale platform with millions of products and thousands of users.
- Collaborated closely with designers to ensure pixel-perfect implementation of user-friendly designs, resulting in a visually appealing and intuitive user experience.
- Implemented a comprehensive Test-Driven Development (TDD) approach, resulting in a 30% reduction in bug reports and improved software quality.

Software Engineer, Jul 2019 - Mar 2020
DoctorKoi Smart - Dhaka, Bangladesh

- Optimized application performance by implementing data synchronization and browser caching strategies, resulting in up to 40% faster load times and improved user experience.
- Collaborated closely with marketing teams and clients to gather requirements, ensuring clear understanding of project goals and features. This client-centric approach contributed to a 30% client retention rate.

Education

B.Tech in **Information Technology -** 2015 - 2019
Lovely Professional University - Punjab, India

- Actively participated in numerous hackathons and coding competitions across India, achieving winning placements in several.
- Completed certifications in ethical hacking and SAP, demonstrating a commitment to professional development and expanding skillset.
